THE POWER OF ENERGY THERAPIES

The Bengston Energy Healing Method®

with Bernadette Doran, RMT

The Bengston Energy Healing Method® is an innovative energy-based technique developed by researcher William Bengston, PhD that engages natural energy fields and systems to support healing.

Dr. Bengston has been conducting research for over 30 years and has proven the effectiveness of his technique in 10 controlled animal experiments conducted in 5 university biological and medical laboratories. His healing research produced the first successful full cures of transplanted mammary cancer and methylcholanthrene-induced sarcomas in experimental mice with hands-on techniques that he helped develop).

The results of clinical applications of the Bengston Energy Healing Method® in human beings suggest healing support for a wide range of health challenges, especially:

- Alzheimer's
- Depression
- Cataracts and other eye conditions
- Gastrointestinal disorders
- Allergies
- Asthma
- And much more

It can be done in person or as a distant treatment. Bengston Method is equally effective for both human beings and animals, including horses and house pets like cats and dogs.

Regarding cancer patients, a variety of factors may influence who might make better candidates than others for Bengston Method energy therapy. Clinical experience indicates that Bengston Method seems to be most effective for patients who have been diagnosed with cancer for the first time, at an early stage. Patients who are experiencing cancer for the second or third time, have had this new recurrence for over a year, and have experienced metastasis into multiply locations have shown to be more challenging to treat.

For additional information, see Dr. Bengston's website at www.bengstonresearch.com.

FEE: \$400 for a course of 4 therapies

For more details and instructions on how to begin a course of therapy, please contact Bernadette at bernadette@bernadettedoran.com
